

CHANGZHOU JLON COMPOSITE CO.,LTD

Infusion Resin feeder

Introduction of Resin feeder:

Resin feeder 50/100 resin feeder is a flexible composite material with a width of 0.05 meter/0.1 meter. It consists of a three-dimensional spacer pad, generated by a single filament, oreformed into a serrated structure, wrapped in a heat bonded non-woven sleeve. It is used as a flow medium for polyester or epoxy resins in reinforced plastics, suitable for vacuum infusion or resin transfer molding processes.

Specification of Resin feeder:

Product code	Raw Material	Color	Glass fiber(g/m)	Temperature resistant
Resin feeder 50	PP/PET/PA6	Grey/Black	30 ± 5	150°C
Resin feeder 100	PP/PET/PA6	Grey/Black	55 ± 5	150°C

Appilcation of Resin feeder

Resin distribution of Vacuum bagging applications.

Boat repairing and building

UAV/Aerospace
